

About MBC

Martin Brothers Construction (MBC) has established itself as a premier choice for government contracts. Since 1996, MBC has earned a reputation as a exceptional, high quality contractor by successfully completing over 300 projects and more than \$200 million worth of heavy civil construction, earthwork, levee construction, grading, paving, underground utilities excavating, concrete work and more, primarily for government and public agencies.

MBC is sufficiently bonded (\$40 million single/\$80 million concurrent) and with a team of over 75 employees and over \$4 million worth of equipment in our fleet, we possess the knowledge, experience and skill necessary to employ optimal construction methods. This means maximum efficiency and minimum cost while delivering high quality projects, often ahead of schedule.

Martin Brothers consistently achieves quality because of our belief in applying experience to ensure effective communication throughout every project. In fact, communication is the cornerstone on which our track record of quality results stands. Constant contact and close interaction with the client helps us attain top-notch standards of quality and efficiency. Planning throughout every step of a project is key to achieving construction quality assurance and Martin Brothers works side-by-side with its clients, respecting concerns and resolving issues quickly so that work can continue to move forward smoothly. After a project is complete, a final quality inspection is performed and final documentation is submitted to the client to confirm that all project requirements have been met. This process of review not only ensures quality results on the project but also helps Martin Brothers to apply those processes to future work.

"We Own Safety"

With an impressive EMR rating of .67, MBC has proven its commitment to safety while establishing true partnering agreements that have helped to build strong relationships.

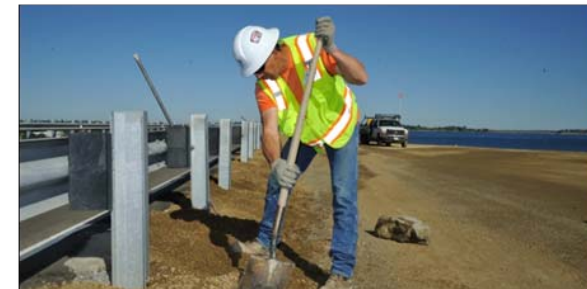

Awards

- Hispanic Business Magazine – Listed #74 of Top 100 Fastest Growing Hispanic-Owned Companies, 2010

"Martin Brothers performed with the highest degree of precision and quality on our Detention Basin project. This project saved the city several hundred thousand dollars by utilizing borrow material which Martin Brothers moved efficiently and expeditiously. I look forward to working with them again."
-Mark Cooke, Senior Civil Engineer, Public Works Department, City of Woodland

"This project [Folsom Dam Phase 2] has been on schedule for 48 months now, which is basically unheard of. We've got the money, we've got the people, and we're postured to do it."

-Col. Tom Chapman, Commander of Army Corps, Sacramento District. (taken from 12/06/09 Sacramento Bee article)
